## Attachment to Advisory Action

In the proposed After Final amendment filed 9/26/03 (Paper No. 15), the new limitations of "while observing the indicator" added to the last line each of Claims 6, 17 and 25, narrow the scope of the claims requiring further consideration and search by the examiner.

Furthermore, it appears that these new limitations introduce new matter under 112, 1<sup>st</sup> paragraph. The examiner notes that the specification (last paragraph of page 18) does discuss that the indicator is observed by a scanning electron microscope. However, the limitations above can imply more than just scanning, such as a mechanical or physical observation of the indicator.
